EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Murphy (34,225) on 12/01/05.

The application has been amended as follows:

Cancel claims 1-8.

Allowable Subject Matter

2. Claims 9-32 are allowed.
3. The following is an examiner's statement of reasons for allowance:

In regard to claims 9-11, 21, 24, and 27, the prior art does not disclose an active matrix display device with the combination of limitation of the claimed invention, specifically including the limitations of:

a photoelectric conversion layer and an upper electrode common to the plurality of light receiving pixels; wherein the upper electrode is connected to a lead-out wiring on a light incident side; and wherein the lead-out wiring is formed by a starting firm different from that of the upper electrode, as claimed in claim 9.

In regard to claims 12-16, 22, 25, and 28, the prior art does not disclose an active matrix display device with the combination of limitation of the claimed invention, specifically including the limitations of:

wherein the light receiving unit includes a plurality of lower electrodes separated from each other at respectives of the light receiving pixels and formed by a starting film the same as that of the electrode layer, a photoelectric conversion layer and an upper electrode common to the plurality of light receiving pixels; wherein the upper electrode is connected to a lead-out wiring on a light incident side; and wherein the lead-out wiring is formed by a starting film different from that of the upper electrode, as claimed in claim 12.

In regard to claims 17-20, 23, 26 and 29, the prior art does not disclose an active matrix display device with the combination of limitation of the claimed invention, specifically including the limitations of:

active elements formed over the substrate and connected to the signal lines and the select lines; a first insulating film over the active elements; an electrode layer formed over the first insulating film and covering at least the signal lines and the select lines; a second insulating film formed over the electrode layer; and pixel electrodes formed over the second insulating film and connected to the active elements; the first insulating film over the signal reading unit; a plurality of lower electrodes formed over the first insulating film, formed by a starting film the same as that of the electrode layer and separated from each other at respectives of the light receiving pixels; a photoelectric conversion layer formed

over the lower electrodes; an upper electrode formed over the photoelectric conversion layer and common to the plurality of light receiving pixels; the second insulating film over the upper electrode; and a lead-out wiring formed over the second insulating film and connected to the upper electrode; wherein the upper electrode is formed by a starting film the same as that of the pixel electrodes, as claimed in claim 17.

In regard to claims 30-32, the prior art does not disclose an active matrix display device with the combination of limitation of the claimed invention, specifically including the limitations of:

A photoelectric conversion layer and an upper electrode common to the light receiving pixels; wherein the lower electrodes are formed by a starting film the same as that of the electrode layer; and wherein the pixel electrodes are formed by a starting film different from that of the upper electrode, as claimed in claim 30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
